

Ethics Litmus Tests

Invest in your values

Six ethics activities

That fit neatly into your existing agile rituals

Build skill sets and vocabulary

Empower individuals and teams to ask the difficult questions

Elicit and synthesise

Establish a safe process to compare and discuss personal and business values

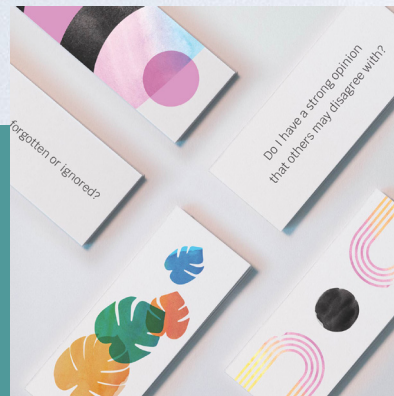

Ready for responsible tech activities that go beyond a strategy document?

Ethics Litmus Tests provide an approachable start for your team. Activities are small and can be easily time boxed, for sustainable habit formation. As confidence grows, your team can write their own prompts,

adjust and fine-tune activities to meet your company's specific challenges. Give your team explicit, visible permission to do the work of harm mapping and mitigation engineering.
